

Moving Screen Location to Extended Setup in Windows 10

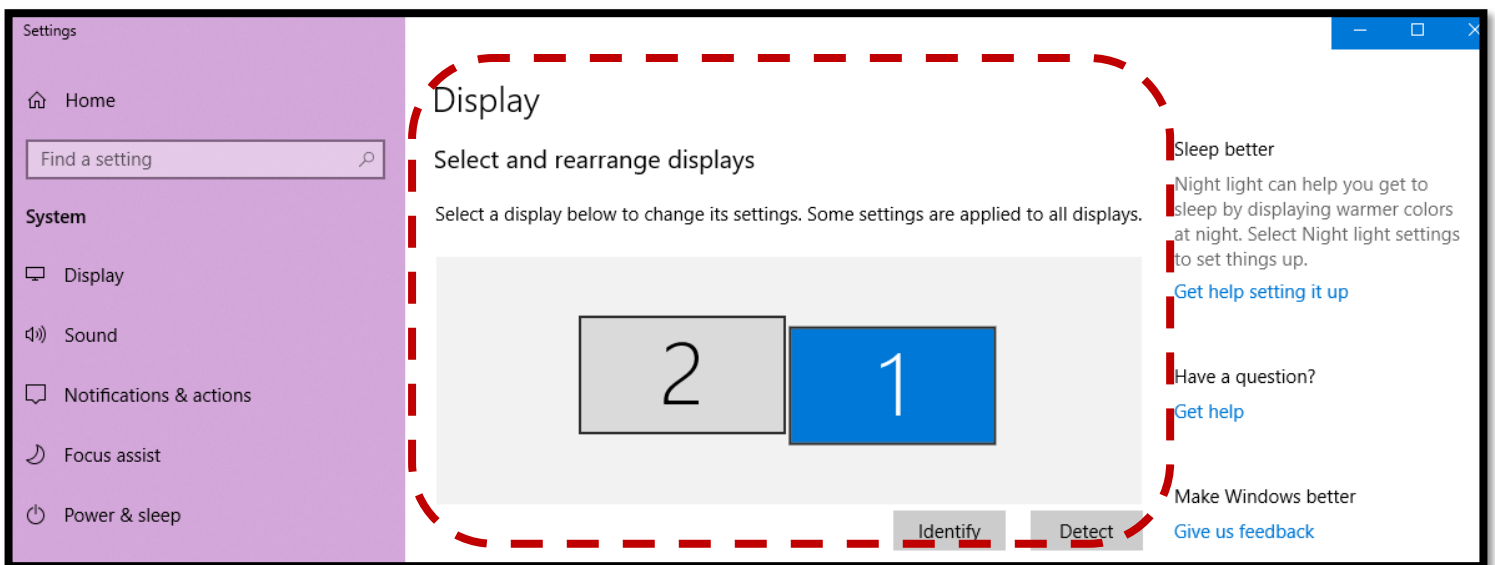

Description: You can move your screen location in Windows 10. To do this, follow the steps below.

Directions for Use:

Start by right clicking on the desktop screen. Then, select 'Display Settings' as shown below:

When you get to the 'Display Settings' screen, you can move screen one and screen two simply by dragging them and changing their positions with your mouse.

Moving Screen Location to Extended Setup in Windows 10

Be sure to click on the 'Apply' button when you are done moving the screen position.
